

Tabela 1. Artigos incluídos após leitura de texto completo. Elaboração própria (2025).

Código	Referência	Nome do artigo
A1	[Chalhoub et al. 2021]	“It did not give me an option to decline”: a longitudinal analysis of the user experience of security and privacy in smart home products
A2	[Habib et al. 2020]	“It’s a scavenger hunt”: usability of websites’ opt-out and data deletion choices
A3	[Habib et al. 2022]	“Okay, whatever”: an evaluation of cookie consent interfaces
A4	[Woods e Johnson 2025]	(Re)designing privacy literacy in the age of generative AI
A5	[O’Connor et al. 2021]	(Un)clear and (in)conspicuous: the right to opt out of sale under CCPA
A6	[Utz et al. 2019]	(Un)informed consent: studying GDPR consent notices in the field
A7	[Gunawan et al. 2021]	A comparative study of dark patterns across mobile and web modalities
A8	[Barrett e Matthee 2018]	A critical analysis of informed use of context-aware technologies
A9	[Palmirani et al. 2018]	A methodological framework to design a machine-readable privacy icon set
A10	[Colesky e Caiza 2018]	A system of privacy patterns for informing users: creating a pattern system
A11	[Colesky et al. 2018]	A system of privacy patterns for user control
A12	[Kocyigit et al. 2024]	A systematic approach for a reliable detection of deceptive design patterns through measurable HCI features
A13	[Bouma-Sims et al. 2023]	A US-UK usability evaluation of consent management platform cookie consent interface design on desktop and mobile
A14	[Grover 2024]	A view from somewhere: shifting expertise in identifying and evaluating dark patterns
A15	[Momen et al. 2020]	Accept - maybe - decline: introducing partial consent for the permission-based access control model of Android
A16	[Andreotta et al. 2022]	AI, big data, and the future of consent
A17	[Alharbi et al. 2023]	An empirical analysis of e-governments’ cookie interfaces in 50 countries
A18	[Lindegren et al. 2021]	An evaluation of three designs to engage users when providing their consent on smartphones
A19	[Bongard-Blanchy et al. 2023]	Analysing the influence of loss-gain framing on data disclosure behaviour: a study on the use case of app permission requests
A20	[Schmitt et al. 2022]	Android permission manager, visual cues, and their effect on privacy awareness and privacy literacy
A21	[Vitale et al. 2018]	Be more transparent and users will like you: a robot privacy and user experience design experiment
A22	[Seiling et al. 2024]	Beware: processing of personal data—informed consent through risk communication
A23	[Ebert et al. 2021]	Bolder is better: raising user awareness through salient and concise privacy notices
A24	[Zhang et al. 2021]	Checking conformance of applications against GUI policies

Código	Referência	Nome do artigo
A25	[Soe et al. 2020]	Circumvention by design: dark patterns in cookie consent for online news outlets
A26	[Fox et al. 2018]	Communicating compliance: developing a GDPR privacy label
A27	[Piccolo et al. 2024]	Consent to data collection: privacy policies and data collection notices (análise do consentimento para a coleta de dados em sites de e-commerce: um olhar da ciência da informação)
A28	[Kanamori et al. 2023]	Construction of a support tool for Japanese user reading of privacy policies and assessment of its user impact
A29	[Doan et al. 2022]	Context, prioritization, and unexpectedness: factors influencing user attitudes about infographic and comic consent
A30	[Santos et al. 2021]	Cookie banners, what's the purpose? Analyzing cookie banner text through a legal lens
A31	[Berens et al. 2022]	Cookie disclaimers: impact of design and users' attitude
A32	[Mejtoft et al. 2023]	Cookies and trust: trust in organizations and the design of cookie consent prompts
A33	[Gundelach e Herrmann 2023]	Cookiescanner: an automated tool for detecting and evaluating GDPR consent notices on websites
A34	[Zhang et al. 2024]	CSChecker: revisiting GDPR and CCPA compliance of cookie banners on the web
A35	[Nouwens et al. 2020]	Dark patterns after the GDPR: scraping consent pop-ups and demonstrating their influence
A36	[Gray et al. 2021]	Dark patterns and the legal requirements of consent banners: an interaction criticism perspective
A37	[Mathur et al. 2019]	Dark patterns at scale: findings from a crawl of 11K shopping websites
A38	[Chalhoub e Flechais 2022]	Data protection at a discount: investigating the UX of data protection from user, designer, and business leader perspectives
A39	[Schneiderheinze et al. 2019]	Development and usability analysis of a multimedia eConsent solution
A40	[Khan et al. 2020]	Disconnecting: towards a semiotic framework for personal data trails
A41	[Ormeno et al. 2024]	Do cookie banners respect my browsing privacy? Measuring the effectiveness of cookie rejection for limiting behavioral advertising
A42	[Matte et al. 2020]	Do cookie banners respect my choice? Measuring legal compliance of banners from IAB Europe's transparency and consent framework
A43	[Gerber et al. 2023]	Don't accept all and continue: exploring nudges for more deliberate interaction with tracking consent notices
A44	[Pesch 2021]	Drivers and obstacles for the adoption of consent management solutions by ad-tech providers
A45	[Neitzke et al. 2023]	Enhancing LGPD compliance: evaluating a checklist for LGPD quality attributes within a government office
A46	[Stellmacher et al. 2022]	Escaping the privacy paradox: evaluating the learning effects of privacy policies with serious games
A47	[Prillard et al. 2024]	Ethical design for data privacy and user privacy awareness in the metaverse
